Bathroom Visual Aid

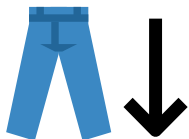

This visual aid was created by AutismWish to help autistic children understand each step that's required when using the bathroom. This visual aid is meant to be printed and placed in the child's bathroom as a reference point to help guide them through each step. We recommend laminating the visual aid to protect it from damage.

If you would like another resource that's not currently available on our website, send us a message at info@autismwish.org with your request or submit the contact form on our home page.
